Petition against Proposal to Timber White's Woods in White Township

The White Township Supervisors are now considering a proposal to remove trees from 229 acres in the White's Woods Nature Center—owned by the township and thus by the township's taxpayers and voters—and they will be voting on it in June. In a 1995 survey of White Township voters conducted by the supervisors themselves, the vote on the timbering proposal was exactly ***2-to-1 against timbering***. The undersigned are ***opposed to the current proposal to cut down trees in our public nature center***, and we urge the supervisors to respect the desires of the voters and taxpayers of White Township.
