## LETTER TO THE EDITOR

# Disappointed, saddened over supervisors' decision

What a disappointment to learn that the White Township supervisors voted to timber the White's Woods Nature Preserve.

The two-hour presentation made to the township supervisors obviously had no effect on their decision to timber the preserve.

Experts in the fields of forestry, biology, economics and geography gave statements contrary to the plan approved by the supervisors. The presentations were factual and

well-documented. The points of view presented were sound and reasonable and only tried to maintain a community asset enjoyed by so many.

It saddens me to know that in a democratic society, the voices of the public are not heard. The public does not want the timbering to occur.

Supervisors, please reconsider your position. Elected officials should represent their constituents.
