
LETTER TO THE EDITOR

Abide by public's wishes

The White Township supervisors may be very sincere in believing timbering is the solution to the "deplorable" conditions they feel are in White's Woods.

But members of the public have expressed that they are against timbering and prefer

the ambiance of an untouched, deep-growth forest.

It is reasonable and rational for the supervisors to abide by the wishes of the community.

Let's preserve White's Woods, a great local treasure.
